POLICY/PROCEDURE FOR PARTIAL RELEASE OF STORMWATER MANAGEMENT BONDS

The Department of Permitting Services will consider reduction of the stormwater management bond following construction of all stormwater management facilities on a permitted site. There will be a one-time 50% reduction of the stormwater management portion of the bond. The following procedure will be used.

1. Confirm with your sediment control/stormwater management (SC/SM) inspector that all stormwater management structures have been constructed in conformance with the approved plans and specifications.
2. Submit a letter requesting partial bond release to this Department. Reference your permit number and include a check for \$130.00 plus a 10% Automation fee, totaling \$143.00 fee. You must also include a signed and sealed letter from your Engineer stating that the stormwater structure(s) has/have been constructed in accordance with the approved plan and specifications. The request must be submitted to:

Department of Permitting Services
Land Development Section
255 Rockville Pike, 2nd Floor
Rockville, Md. 20850

ATTN: Land Development Permit Technician

3. Your SC/SM inspector will approve or deny the request and forward it for processing by the Department of Permitting Services' staff.

NOTE: *The total bond amount shown on your permit includes both sediment control and stormwater management bonds. Therefore, the amount for sediment control will be subtracted from the total bond amount before a 50% reduction is calculated.*
